OUTDOOR STRUCTURES

Designed around your villa.

WOOD | STEEL | SHADE | PRIVACY | OUTDOOR LIVING

Specialists in Outdoor Structures

RIWAQ Outdoor Structures is a Bahrain-based specialist in the design, supply and installation of refined wood-and-steel structures for outdoor spaces. We focus particularly on villa and residential projects, creating customized solutions for entrances, passages, courtyards, gardens, privacy areas and outdoor living spaces.

Every RIWAQ project is developed around the architecture, dimensions and daily use of the property - combining functional shade, privacy, durability and clean contemporary design.

OUR PURPOSE

To transform underused outdoor areas into elegant, comfortable and functional spaces designed for the Gulf lifestyle.

Built on Experience

25+

YEARS STEEL FABRICATION EXPERIENCE

Mr. R.K. Nair, Business Development Manager, brings more than 25 years of steel fabrication experience, supporting RIWAQ with practical knowledge in fabrication, welding, detailing, site coordination and installation.

Founder & Director

Mr. Mohamed Qambar

RIWAQ is founded and directed by Mohamed Qambar. His wider business interests include paper and packaging manufacturing in Bahrain and a trading division in Saudi Arabia, providing a practical background in manufacturing, sourcing, procurement, quality control and regional business development.

FOCUSED ON BAHRAIN VILLAS

Designed around the property - not a fixed product.

RIWAQ welcomes villa owners looking to improve exposed entrances, side passages, courtyards, gardens and privacy areas with professionally designed outdoor structures.

Built for Outdoor Performance

Our material selection is central to the RIWAQ approach. We combine carefully sourced timber with professionally fabricated steel to create structures that are refined in appearance and practical for Gulf outdoor use.

European-Origin Timber

For premium outdoor structures, RIWAQ uses high-performance wood supplied through specialist suppliers in Dubai and originating from Europe. Timber is selected for exterior architectural applications with attention to stability, durability, appearance and consistent quality.

Professional Fabrication

Steel components are professionally fabricated and finished according to project requirements. Processes may include cutting, welding, galvanizing, exterior-grade powder coating, structural fixing, wall mounting and column-supported installation.

Galvanized Steel

Protection specified according to application.

Powder Coating

Clean exterior-grade architectural finish.

Selected Timber

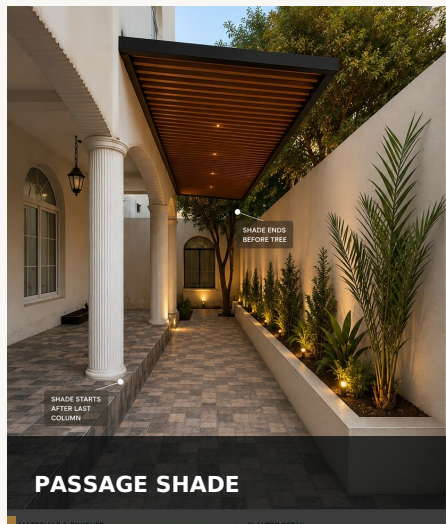

Wood specification matched to design and budget.

Professional Fixing

Installation planned around site conditions.

Outdoor Architecture for Villas

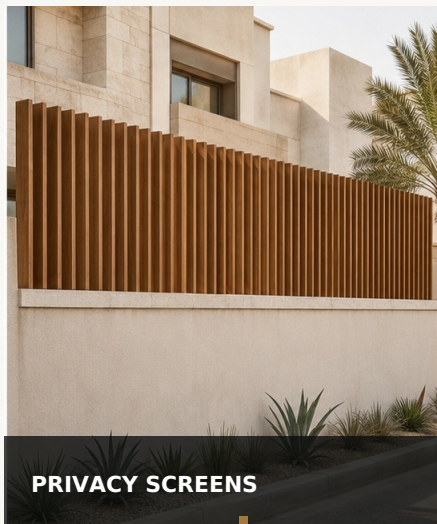

RIWAQ develops a focused family of wood-and-steel solutions. Each system can be adapted to the property, dimensions, mounting conditions, level of shade and desired architectural character.

PASSAGE SHADE

Passage Shade Systems

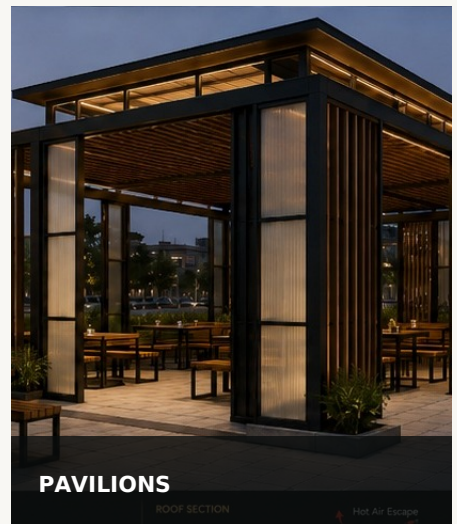

For narrow villa walkways and side passages, including wall-mounted and supported options.

PRIVACY SCREENS

Entrance & Walkway Shades

A more comfortable and architecturally connected arrival from outer gate to home entrance.

PAVILIONS

Courtyard Sunbreakers

Partial shade with openness, airflow and a strong architectural identity.

Pergolas & Garden Pavilions

Defined outdoor living spaces for seating, dining, family use and hospitality.

Villa Entrance Structures

Wood-and-steel treatments for gates, entrance walls, canopies and architectural extensions.

Privacy Screens

Elegant privacy for boundary walls, gardens, pools, rooftops and seating areas.

Architectural Awnings

Compact shade elements for doors, windows and selected facade areas.

Custom Outdoor Structures

Bespoke solutions developed around unusual spaces or specific project requirements.

From Site to Final Handover

Our process is deliberately practical: understand the site first, develop the right structure, specify suitable materials, then fabricate and install professionally.

SITE-SPECIFIC DESIGN

Final dimensions, structural details, mounting methods and material specifications are confirmed according to site conditions and project requirements.

Why RIWAQ

Specialized outdoor structures. Experienced fabrication. Carefully selected materials. Local project coordination.

25+ YEARS

Steel fabrication experience
